

Since 2004, Dr. Kevin Rose has been providing the best in plastic surgery to patients throughout Utah Valley.

CONFIDENCE IS BEAUTY

Dr. Kevin Rose and his team at The Rose Clinic use state-of-the-art techniques and facilities to provide beautiful solutions to patients

If there's anything we can say 2020 taught, it's that life can be hard sometimes. Jobs come and go, sickness strikes and the peaceful life usually seen can be turned upside down.

But, no matter the challenge, if you move forward confidently — embracing the opportunities that will surely come — the outcome is usually better.

And few things in life make you feel more confident that looking your best.

At The Rose Clinic in Orem, Dr. Kevin Rose and his team of professionals are dedicated to all things “looking your best.” As a board-certified plastic surgeon who has been treating local patients since 2004, Dr. Rose leads a team of skilled, experienced caregivers dedicated to the best possible outcomes.

They are confidence builders.

And, with the opening of The Rose Clinic's new location, the team now has a facility to match its mission.

The 8,000-square-foot building includes an in-house operating suite, giving patients more flexibility in scheduling and more convenience. The Rose Surgery Center is AAAASF-certified,

ensuring the highest levels of safety for patients. It also allows Dr. Rose to hand-pick the people — anesthesiologists, nurses and others — working with him. He's been able to create his “dream team” of medical professionals assisting him in every procedure.

The facility includes individual recovery rooms where patients can stay — even overnight — until they are ready to go home.

The Rose Spa is also housed in the facility, providing pampering and self-care to men and women throughout the Valley.

Beyond the building, though, are caring individuals who treat each patient with respect and dignity. Care coordinators work through the process with the patient, from the first free consultation to recovery and follow up.

This year, Dr. Rose is ready to help patients put the past — and their past insecurities — behind them and gain the confidence beauty brings.

The Rose Surgery Center is AAAASF-certified, meaning it has passed rigorous standards dedicated to maximizing patient safety.

Medical Tip

“Fat is good! Don't waste it! If I am going to take fat out of a patient, I'm going to recommend putting at least some of it where they need it: the face, the breasts, the buttock. This is called 'banking fat.' Fat contains stem cells which helps rejuvenate the area where it is injected.”

Patients benefit from a care coordinator who works closely with the patient throughout the entire process.
