

Dr. Kevin Rose knows plastic surgery changes lives. As one of the valley's premier plastic surgeons, his greatest endorsement comes from client testimonials thanking him for his dedication, skill and professionalism. One recent patient commented, "I wanted to thank you. Now I am officially dancing around the house! I couldn't even look in a mirror before we started, and now I look for mirrors! It's unbelievable the difference you have made in my life."

The hundreds of patients he has helped at The Rose Clinic for Plastic and Migraine Surgery trust the artistic eye and skilled hands of Dr. Rose. They refer family and friends to him, knowing the outcomes he achieves are unmatched.

A fully-trained plastic surgeon, Dr. Rose offers traditional procedures like tummy tuck, breast augmentation and lift, breast reduction and liposuction. His artistic eye also gives him a unique perspective when performing eyelid, chin or nose surgery. Dr. Rose is also highly skilled in performing facelifts, Botox injections and laser skin resurfacing. Microdermabrasion, chemical peels and European facials are also available at The Rose Clinic, performed by their Master Aesthetician.

In addition, Dr. Rose is one of a handful of plastic surgeons trained in the surgical treatment of migraine headaches. He studied and conducted research at the prestigious Cleveland Clinic with Dr. Bahman Guyuron, the pioneer of the surgical technique.

An innovative procedure with revolutionary results, migraine surgery has proven more than 92 percent effective in reducing the frequency and severity of migraine headaches. Patients come from all over the Western states for the expertise Dr. Rose offers in migraine and plastic surgery.

The Rose Clinic functions under the premise of comfort, privacy, respect and outstanding surgical results. Given the long-term relationship that plastic and migraine surgery procedures require, patients often comment that Dr. Rose's "bedside manner" and ability to relate to patients is second to none.
